Brushless step motor technology
with integrated controls

**IMS™ INTELLIGENT MOTION
SYSTEMS, INC.**

by Schneider Electric

Brushless step motor technology with integrated controls — make your best move

Over 156,000 integrated motion control solutions
available with the leading technology of MDrivePlus™

MDrivePlus Versions

Microstepping

Motor + Driver with Step & Direction Input

- Brushless step motors
NEMA sizes 14, 17, 23, 34, 34AC, 42AC
- 20 resolutions up to 51,200
- Optically isolated step/direction inputs
- Options: encoder, control knob, gearbox,
linear slide, linear actuator, IP65 rating

Motion Control

Motor + Driver + Programmable Controller

- Single supply from +12 up to +75 VDC
or 120/240 VAC (see AC version below)
- Up to 8 I/O lines
- 10-bit analog input, configurable
- RS-422/485 with CANopen option

Speed Control

Motor + Driver + Variable Speed Controller

- Programmable velocity control
- 10-bit analog speed control input
- Resolutions switchable on-the-fly
- Electronically configurable

AC Power

Motor + Driver + Controller + Power Supply*

- Brushless step motor NEMA size 34 or 42
- Single supply: 120 or 240 VAC
- Holding torque to 2294 oz-in
- High positioning accuracy
- No tuning required
- High starting torque

*Motion Control Version

Ordering

IMS has a worldwide network of authorized Stocking Distributors. When opening an account, they typically offer local stock, lower shipping costs, local applications support and lower order minimums than the factory. Order through your local IMS-authorized Stocking Distributor. For the name of an authorized Distributor near you, call IMS Customer Service at +00 (1) 860 295-6102 or contact an IMS Representative listed at www.imshome.com.

Customer Service

The IMS Customer Service Department is open from 8:30 A.M. to 5:00 P.M., Monday through Friday, Eastern Time (U.S.A.).

Tel.....+00 (1) 860 295-6102
Fax.....+00 (1) 860 295-6107

MICROSTEPPING

FEATURES

- Highly Integrated Microstepping Driver and NEMA 14 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +48 VDC
- Cost Effective
- Extremely Compact
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Optically Isolated Input Options:
 - Universal +5 to +24 VDC Signals, Sourcing or Sinking
 - Differential +5 VDC Signals
- Automatic Current Reduction
- Configurable:
 - Motor Run/Hold Current
 - Motor Direction vs. Direction Input
 - Microstep Resolution
 - Clock Type: Step and Direction, Quadrature, Step Up and Step Down, Clockwise and Counterclockwise
 - Programmable Digital Filtering for Clock and Direction Inputs
- Available Options:
 - Long Life Linear Actuators**
 - Encoder: External Optical or Internal Magnetic
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
- Single Motor Length Available
- Setup Parameters May Be Switched On-The-Fly
- Pluggable Locking Wire Crimp Interface
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

**Consult Factory for Availability.

DESCRIPTION

The **MDrive14Plus Microstepping** high torque integrated motor and step and direction driver is ideal for designers who want the simplicity of a motor with on-board electronics. The integrated electronics of the MDrive14Plus eliminate the need to run motor cabling through the machine, reducing the potential for problems due to electrical noise.

The unsurpassed smoothness and performance delivered by the MDrive14-Plus Microstepping are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive14Plus accepts a broad input voltage range from +12 to +48 VDC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long runs and multiple drive systems. An extended operating range of -40° to +85°C provides long life, trouble free service in demanding environments.

The MDrive14Plus uses a NEMA 14 frame size high torque brushless step motor integrated with a microstepping driver, and accepts up to 20 resolution settings from full to 256 microsteps per full step, including: degrees, metric and arc minutes. These settings may be changed on-the-fly or downloaded and stored in nonvolatile memory with the use of a simple GUI which is provided. This eliminates the need for external switches or resistors. Parameters are changed via an SPI port.

Motor configurations include a single length rotary and a linear actuator with long life Acme screw**. Rotary motors may include an encoder, control knob or planetary gearbox. Interface connections are accomplished using locking wire crimp connectors.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. *See pg 5.*

The MDrive14Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

The IMS Motor Interface software is an easy to install and use GUI for configuring the MDrive14Plus from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com.

- The IMS SPI Motor Interface features:
- Easy installation.
 - Automatic detection of MDrive version and communication configuration.
 - Will not set out-of-range values.
 - Tool-tips display valid range setting for each option.
 - Simple screen interfaces.

MDrive14Plus MICROSTEPPING

STANDARD SPECIFICATIONS

INPUT VOLTAGE (+V)	Range	+12 to +48 VDC <i>Power supply current requirements = 1A (maximum) per MDrive14Plus. Actual power supply current will depend on voltage and load.</i>	
	ISOLATED INPUT	Universal	Voltage Range: +5 to +24 VDC Sourcing or Sinking Step Clock, Direction and Enable
Differential		Voltage Range: +5 VDC Clockwise and Counterclockwise	
MOTION	Digital Filter Range	50 nS to 12.9 μS (10 MHz to 38.8 kHz)	
	Clock Types	Step/Direction, Quadrature, Step Up/Step Down, Clockwise/Counterclockwise	
	Step Frequency	2 MHz Default / 5 MHz Max	
	Resolution	Number of Settings	20
Steps Per Revolution		200, 400, 800, 1000, 1600, 2000, 3200, 5000, 6400, 10000, 12800, 20000, 25000, 25600, 40000, 50000, 51200, 36000 (0.01 deg/μstep), 21600 (1 arc minute/μstep), 25400 (0.001mm/μstep)	
THERMAL	Operating Temperature	Heat Sink	-40° to +85°C (non-condensing)
		Motor	-40° to +100°C (non-condensing)

SETUP PARAMETERS

	Function	Range	Units	Default
MHC	Motor Hold Current	0 to 100	percent	5
MRC	Motor Run Current	1 to 100	percent	25
MSEL	Microstep Resolution	1, 2, 4, 5, 8, 10, 16, 25, 32, 50, 64, 100, 108, 125, 127, 128, 180, 200, 250, 256	μsteps per full step	256
DIR	Motor Direction Override	0/1	—	CW
HCDT	Hold Current Delay Time	0 or 2–65535	mSec	500
CLK TYPE	Clock Type	Step/Dir, Quadrature, Up/Down, CW/CCW	—	Step/Dir
CLK IOF	Clock and Direction Filter	50 nS to 12.9 μS (10 MHz to 38.8 kHz)	nS (MHz)	200 nS (2.5 MHz)
USER ID	User ID	Customizable	1–3 characters	IMS
EN ACT	Enable Active	High/Low	—	High

All parameters are set using the supplied IMS SPI Motor Interface GUI and may be changed on-the-fly. An optional Communication Converter is recommended with first orders.

ORDER INFORMATION — MDrive14Plus Microstepping

CONNECTIVITY

- new QuickStart Kit**
For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable, instructions and CD for MDrivePlus initial functional setup and system testing.
- new Communication Converter**
Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set/program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0' (3.6m).
Mates to connector:
12-Pin Wire CrimpMD-CC305-001
- Prototype Development Cable**
Speed test/development with pre-wired mating connectors that have ying leads other end. Length 10.0' (3.0m).
Mates to connector:
12-Pin Wire CrimpPD12B-1434-FL3
- new Mating Connector Kit**
Use to build your own cables. Kit contains 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.
Mates to connector:
12-Pin Wire CrimpCK-08

** Consult Factory for Availability.

Connectivity details: www.imshome.com/cables_cordsets.html

OPTIONS

Linear Actuator**
The MDrive14Plus is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

External Encoder
External optical encoders, single-end or differential, are offered factory-mounted with the MDrive14Plus. All encoders come with an index mark. Refer to the table below.

Line Count	100	200	250	256	400	500	512	1000	1024
Single-End part#	E1	E2	E3	EP	E4	E5	EQ	E6	ER
Differential part#	EAL	EBL	ECL	EWL	EDL	EHL	EXL	EJL	EYL

Optional encoder cables are available. Order separately.
Single-end Cable (12.0'/30.5cm)..... ES-CABLE-2
Differential Locking Cable (6.0'/1.8m) ED-CABLE-6

Internal Encoder
Internal differential magnetic encoders with index mark are available.

Line Count	100	200	250	256	400	500	512	800	1000
Differential part#	EAM	EBM	ECM	EWMM	EDM	EHM	EXM	EFM	EJM

An optional encoder cable is available. Order separately.
Internal Encoder Cable (10.0'/3.0m) PD10-3400-FL3

Control Knob
The MDrive14Plus is available with a factory-mounted rear control knob for manual shaft positioning.

Planetary Gearbox
Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive14Plus. Refer to details and part numbers on the back cover.

MOTION CONTROL

(with optional CANopen)

STANDARD FEATURES

- Highly Integrated Microstepping Driver, Intelligent Motion Controller and NEMA 14 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +48 VDC
- Cost Effective
- Extremely Compact
- Available Options:
 - Long Life Linear Actuators**
 - Internal Magnetic Encoder for Closed Loop Control
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
- Auxiliary Logic Power Supply Input
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Open or Optional Closed Loop Control
- Programmable Motor Run and Hold Currents
- Four +5 to +24 VDC I/O Lines Accept Sourcing or Sinking Outputs
- One 10 Bit Analog Input Selectable: 0 to +10VDC, 0 to +5VDC, 0-20mA, 4-20mA
- 0 to 5MHz Step Clock Rate Selectable in 0.59Hz Increments
- RS-422/485 Communications
- 62 Software Addresses for Multi-Drop Communications
- Simple 1 to 2 Character Instructions
- Pluggable Locking Wire Crimp Interface

EXPANDED PLUS² FEATURES

- +24 VDC Tolerant I/O Lines Sourcing or Sinking, Inputs and Outputs:
 - 8 I/O Lines with Electronic Gearing (or)
 - 4 I/O Lines with External/Remote Encoder for Closed Loop Control
- High Speed Position Capture Input or Trip Output
- Pluggable Locking Wire Crimp Interface
- Optional CANopen Communication

**Consult Factory for Availability.

DESCRIPTION

The **MDrive14Plus Motion Control** offers system designers a cost effective, full featured programmable motion controller integrated with a NEMA 14 high torque 1.8° brushless step motor and a +12 to +48 volt microstepping driver.

The unsurpassed smoothness and performance delivered by the MDrive14Plus Motion Control are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive14Plus accepts a broad input voltage range from +12 to +48 VDC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long cable runs and multiple drive systems. An extended operating range of -40° to +85°C provides long life, trouble free service in demanding environments.

Standard features of all MDrive14Plus Motion Control include four +5 to +24 volt general purpose I/O lines, one 10 bit analog input, 0 to 5MHz step clock rate, 20 microstep resolutions up to 51,200 steps per revolution, and full featured easy-to-program instruction set.

Expanded features of MDrive14Plus² versions include up to eight +5 to +24 volt general purpose I/O lines and the capability of electronic gearing by following a rotary or linear axis at an electronically controlled ratio, or an output clock can be generated fixed to the internal step clock.

All MDrive14Plus Motion Control are available with optional closed loop control. This increases functionality by

adding stall detection, position maintenance and find index mark.

The closed loop configuration is added via a 512 line (2048 edge) magnetic encoder with index mark, internal to the unit so there is no increase in length. Or, for an expanded choice of line counts and resolutions with MDrive14Plus² versions only, closed loop control is available with an interface to a remotely mounted user-supplied external encoder.

The MDrive communicates over RS-422/485 which allows for point-to-point or multiple unit configurations utilizing one communication port. Addressing and hardware support up to 62 uniquely addressed units communicating over a single line. Baud rate is selectable from 4.8 to 115.2kbps.

Optional communication protocols include CANopen. The CAN bus is 2.0B active (11 and/or 29 bit) and is capable of all standard frequencies from 10kHz to 1MHz. CANopen features include node guarding, heartbeat producer, SDOs and PDOs. Highlights include variable PDO mapping and extended node identifier.

Motor configurations include a single length rotary and a linear actuator with long life Acme screw**. Interface connections are accomplished using locking wire crimp connectors.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. See pg 9.

The MDrive14Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

MDrive14Plus MOTION CONTROL

STANDARD SPECIFICATIONS (Plus Versions)

INPUT VOLTAGE (+V)	Range	+12 to +48 VDC <i>Power supply current requirements = 1A (maximum) per MDrive14Plus. Actual power supply current will depend on voltage and load.</i>

ORDER INFORMATION — MDrive14Plus Motion Control

CONNECTIVITY

QuickStart Kit
For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

Communication Converters
Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0' (3.6m).
Mates to connector:
12-Pin Wire Crimp MD-CC403-001
10-Pin Wire Crimp MD-CC402-001
DB9 CANopen MD-CC500-000*
*Requires mating connector adapter and power supply, not supplied.

Prototype Development Cables
Speed test/development with pre-wired mating connectors that have ying leads other end. Length 10.0' (3.0m).
Mates to connector:
12-Pin Wire Crimp PD12B-1434-FL3
10-Pin Wire Crimp PD10-1434-FL3
16-Pin Wire Crimp PD16-1417-FL3

Mating Connector Kits
Use to build your own cables. Kit contains 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.
Mates to connector:
12-Pin Wire Crimp CK-08
10-Pin Wire Crimp CK-02
16-Pin Wire Crimp CK-10

OPTIONS

Linear Actuator**
The MDrive14Plus is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder
All MDrive14Plus Motion Control versions are available with an optional internal 512-line (2048 count) magnetic encoder with index mark.

Remote Encoder (Plus² versions only)
MDrive14Plus² Motion Control versions are available with differential encoder inputs for use with a remote encoder (not supplied).

Control Knob
The MDrive14Plus is available with a factory-mounted rear control knob for manual shaft positioning.

Planetary Gearbox
Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive14Plus. Refer to details and part numbers on the back cover.

**Consult Factory for Availability.

MDRIVE 17™

MOTOR+DRIVER

Plus

MICROSTEPPING

FEATURES

- Highly Integrated Microstepping Driver and NEMA 17 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +48 VDC
- Cost Effective
- Extremely Compact
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Optically Isolated Input Options:
 - Universal +5 to +24 VDC Signals, Sourcing or Sinking
 - Differential +5 VDC Signals
- Automatic Current Reduction
- Configurable:
 - Motor Run/Hold Current
 - Motor Direction vs. Direction Input
 - Microstep Resolution
 - Clock Type: Step and Direction, Quadrature, Step Up and Step Down, Clockwise and Counterclockwise
 - Programmable Digital Filtering for Clock and Direction Inputs
- Available Options:
 - Long Life Linear Actuators**
 - Encoder: External Optical or Internal Magnetic
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
 - IP65 Sealed Configuration with M23 Circular Connector¹
- 3 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Fly
- Interface Options:
 - Pluggable Locking Wire Crimp
 - Pluggable Terminal Strip
 - 12.0" (30.5cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

DESCRIPTION

The **MDrive17Plus Microstepping** high torque integrated motor and step and direction driver is ideal for designers who want the simplicity of a motor with on-board electronics. The integrated electronics of the MDrive17Plus eliminate the need to run motor cabling through the machine, reducing the potential for problems due to electrical noise.

The unsurpassed smoothness and performance delivered by the MDrive17Plus Microstepping are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive17Plus accepts a broad input voltage range from +12 to +48 VDC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long runs and multiple drive systems. An extended operating range of -40° to +85°C provides long life, trouble free service in demanding environments.

The MDrive17Plus uses a NEMA 17 frame size high torque brushless step motor integrated with a microstepping driver, and accepts up to 20 resolution settings from full to 256 microsteps per full step, including: degrees, metric and arc minutes. These settings may be changed on-the-fly or downloaded and stored in nonvolatile memory with the use of a simple GUI which is provided. This eliminates the need for external switches or resistors. Parameters are changed via an SPI port.

For use in environments where exposure to chemical, dust and liquids may occur, a sealed MDrive17Plus-65 Microstepping

unit with 19-pin M23 circular connector meets IP65 specifications.¹

The versatile MDrive17Plus Microstepping is available in multiple configurations to fit various system needs. Rotary motor versions come in three lengths and may include an encoder, control knob, planetary gearbox or linear slide. Long life Acme screw linear actuators** are also available.

Numerous connector styles give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads, pluggable terminal strip, locking wire crimp connectors, and M23 circular connectors on IP65 sealed versions¹.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. *See pg 14.*

The MDrive17Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushlessstep motor applications.

CONFIGURING

The IMS Motor Interface software is an easy to install and use GUI for configuring the MDrive17Plus from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com.

The IMS SPI Motor Interface features:

- Easy installation.
- Automatic detection of MDrive version and communication configuration.
- Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Simple screen interfaces.

**Consult Factory for Availability.

¹Not available with Differential Input option.

MDrive17Plus MICROSTEPPING

STANDARD SPECIFICATIONS

INPUT VOLTAGE (+V)	Range	+12 to +48 VDC <i>Power supply current requirements = 2A (maximum) per MDrive17Plus. Actual power supply current will depend on voltage and load.</i>	
ISOLATED INPUT	Universal	Voltage Range: +5 to +24 VDC Sourcing or Sinking Step Clock, Direction and Enable	
	Differential	Voltage Range: +5 VDC Clockwise and Counterclockwise	
MOTION	Digital Filter Range	50 nS to 12.9 μ S (10 MHz to 38.8 kHz)	
	Clock Types	Step/Direction, Quadrature, Step Up/Step Down, Clockwise/Counterclockwise	
	Step Frequency	2 MHz Default / 5 MHz Max	
	Resolution	Number of Settings	20
Steps Per Revolution		200, 400, 800, 1000, 1600, 2000, 3200, 5000, 6400, 10000, 12800, 20000, 25000, 25600, 40000, 50000, 51200, 36000 (0.01 deg/ μ step), 21600 (1 arc minute/ μ step), 25400 (0.001mm/ μ step)	
THERMAL	Operating Temperature	Heat Sink	-40° to +85°C (non-condensing)
		Motor	-40° to +100°C (non-condensing)

SETUP PARAMETERS

	Function	Range	Units	Default
MHC	Motor Hold Current	0 to 100	percent	5
MRC	Motor Run Current	1 to 100	percent	25
MSEL	Microstep Resolution	1, 2, 4, 5, 8, 10, 16, 25, 32, 50, 64, 100, 108, 125, 127, 128, 180, 200, 250, 256	μ steps per full step	256
DIR	Motor Direction Override	0/1	—	CW
HCDT	Hold Current Delay Time	0 or 2-65535	mSec	500
CLK TYPE	Clock Type	Step/Dir, Quadrature, Up/Down, CW/CCW	—	Step/Dir
CLK IOF	Clock and Direction Filter	50 nS to 12.9 μ S (10 MHz to 38.8 kHz)	nS (MHz)	200 nS (2.5 MHz)
USER ID	User ID	Customizable	1-3 characters	IMS
EN ACT	Enable Active	High/Low	—	High

All parameters are set using the supplied IMS SPI Motor Interface GUI and may be changed on-the-fly. An optional Communication Converter is recommended with first orders.

MOTOR SPECIFICATIONS

	Holding Torque	Detent Torque	Rotor Inertia	Weight (Motor+Driver)

M DRIVE 17™ MOTOR+DRIVER 17™ *Plus* MOTION CONTROL (with optional CANopen)

STANDARD FEATURES

- Highly Integrated Microstepping Driver, Intelligent Motion Controller and NEMA 17 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +48 VDC
- Cost Effective
- Extremely Compact
- Available Options:
 - Long Life Linear Actuators**
 - Internal Magnetic Encoder for Closed Loop Control
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- 3 Rotary Motor Lengths Available
- Auxiliary Logic Power Supply Input
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Open or Optional Closed Loop Control
- Programmable Motor Run and Hold Currents
- Four +5 to +24 VDC I/O Lines Accept Sourcing or Sinking Outputs
- One 10 Bit Analog Input Selectable: 0 to +10VDC, 0 to +5VDC, 0-20 mA, 4-20 mA
- 0 to 5MHz Step Clock Rate Selectable in 0.59Hz Increments
- RS-422/485 or Optional CANopen Communications
- 62 Software Addresses for Multi-Drop Communications
- Simple 1 to 2 Character Instructions
- Interface Options:
 - Pluggable Terminal Strip
 - 12.0" (30.5cm) Flying Leads

EXPANDED PLUS² FEATURES

- +24 VDC Tolerant I/O Lines Sourcing or Sinking, Inputs and Outputs:
 - 8 I/O Lines with Electronic Gearing (or)
 - 4 I/O Lines with External/Remote Encoder for Closed Loop Control
- High Speed Position Capture Input or Trip Output
- Pluggable Locking Wire Crimp Interface
- IP65 Sealed Configuration with M12/M23 Circular Connectors

**Consult Factory for Availability.

DESCRIPTION

The **MDrive17Plus Motion Control** offers system designers a cost effective, full featured programmable motion controller integrated with a NEMA 17 high torque 1.8° brushless step motor and a +12 to +48 volt microstepping driver.

The unsurpassed smoothness and performance delivered by the MDrive17Plus Motion Control are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive17Plus accepts a broad input voltage range from +12 to +48 VDC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long cable runs and multiple drive systems. An extended operating range of -40° to +85°C provides long life, trouble free service in demanding environments.

Standard features of all MDrive17Plus Motion Control include four +5 to +24 volt general purpose I/O lines, one 10 bit analog input, 0 to 5MHz step clock rate, 20 microstep resolutions up to 51,200 steps per revolution, and full featured easy-to-program instruction set.

Expanded features of MDrive17Plus² versions include up to eight +5 to +24 volt general purpose I/O lines and the capability of electronic gearing by following a rotary or linear axis at an electronically controlled ratio, or an output clock can be generated fixed to the internal step clock.

For use in environments where exposure to chemical, dust and liquids may occur, MDrive17Plus²-65 sealed assembly versions are designed to meet IP65 specifications.

All MDrive17Plus Motion Control are available with optional closed loop control. This increases functionality by add-

ing stall detection, position maintenance and find index mark.

The closed loop configuration is added via a 512 line (2048 edge) magnetic encoder with index mark, internal to the unit so there is no increase in length. Or, for an expanded choice of line counts and resolutions with MDrive17Plus² versions only, closed loop control is available with an interface to a remotely mounted user-supplied external encoder.

The MDrive communicates over RS-422/485 which allows for point-to-point or multiple unit configurations utilizing one communication port. Addressing and hardware support up to 62 uniquely addressed units communicating over a single line. Baud rate is selectable from 4.8 to 115.2kbps.

Optional communication protocols include CANopen. The CAN bus is 2.0B active (11 and/or 29 bit) and is capable of all standard frequencies from 10kHz to 1MHz. CANopen features include node guarding, heartbeat producer, SDOs and PDOs. Highlights include variable PDO mapping and extended node identifier.

Motor configurations include a single shaft rotary in three lengths, and linear actuators with long life Acme screw**.

Numerous connector styles give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads, pluggable terminal strip, locking wire crimp connectors, and M12/M23 circular connectors on IP65 sealed versions.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. *See pg 19.*

The MDrive17Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

MDrive17Plus MOTION CONTROL

STANDARD SPECIFICATIONS (Plus Versions)

INPUT VOLTAGE (+V)	Range	+12 to +48 VDC <i>Power supply current requirements = 2A (maximum) per MDrive17Plus. Actual power supply current will depend on voltage and load.</i>		
	AUX. LOGIC INPUT VOLTAGE	Range	+12 to +24 VDC Maintains power to control and feedback circuits (only) when input voltage is removed.

ORDER INFORMATION — MDrive17Plus Motion Control

CONNECTIVITY

QuickStart Kit
For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

Communication Converters
Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set/program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0" (3.6m).

- Mates to connector:*
- 10-Pin IDCMD-CC400-001
 - 10-Pin Wire CrimpMD-CC402-001
 - DB9 CANopenMD-CC500-000*
 - 5-Pin M12 CANopen (sealed version)MD-CC500-000*
 - 5-Pin M12 RS-422/485 (sealed version)MD-CC401-001
- *Requires mating connector adapter and power supply, not supplied.

Prototype Development Cables
Speed test/development with pre-wired mating connectors that have varying leads other end. Length 10.0' (3.0m).

- Mates to connector:*
- 10-Pin Wire CrimpPD10-1434-FL3
 - 16-Pin Wire CrimpPD16-1417-FL3
- For IP65 sealed versions, single-ended cordsets are PVC jacketed with foil shield and unconnected drain wire. Length 13.0' (4.0m).
- 19-Pin M23
 - Straight TerminationMD-CS100-000
 - Right Angle TerminationMD-CS101-000

Mating Connector Kits
Use to build your own cables. Kit contains 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.

Mates to connector:

- 10-Pin Wire CrimpCK-02
- 16-Pin Wire CrimpCK-10

Kit contains 5 mating connectors that press fit onto ribbon cable. Cable not supplied.

- 10-Pin IDCCK-01

OPTIONS

Linear Actuator**
The MDrive17Plus is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder
All MDrive17Plus Motion Control versions are available with an optional internal 512-line (2048 count) magnetic encoder with index mark.

Remote Encoder (Plus² versions only)
MDrive17Plus² Motion Control versions are available with differential encoder inputs for use with a remote encoder (not supplied).

Control Knob‡
The MDrive17Plus is available with a factory-mounted rear control knob for manual shaft positioning.

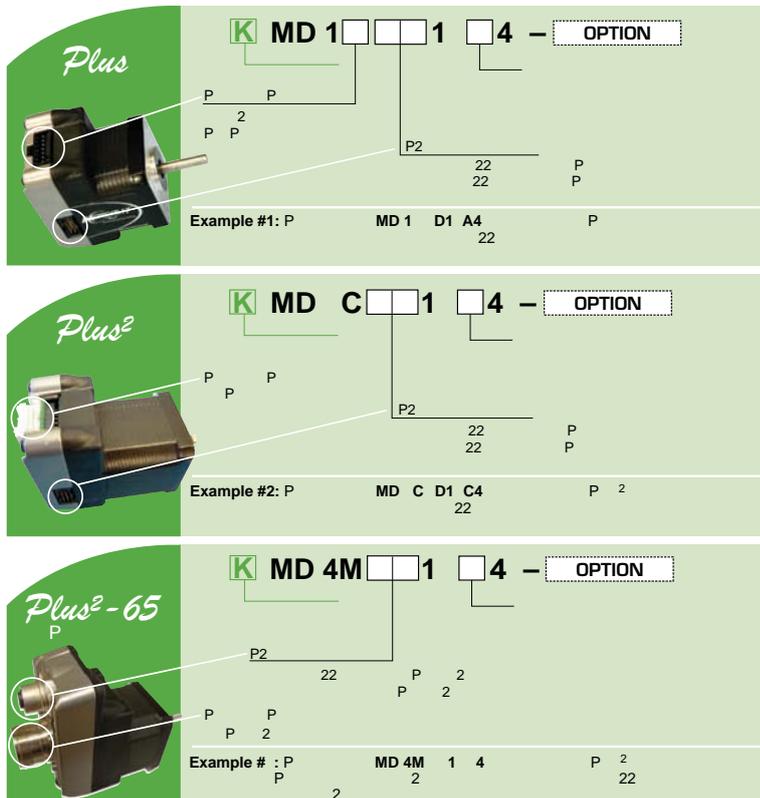

Planetary Gearbox
Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive17Plus. Refer to details and part numbers on page 69.

Linear Slide
Integrated linear slides are available factory installed for precision linear movement. Screw leads are 0.1", 0.2", 0.5" or 1.0" of travel per rev. Slides are 12.0" (30.5cm) to 36.0" (91.44cm) long, or contact the factory for custom lengths. For more details, go to page 72.

** Consult Factory for Availability.
‡ Not Available with Sealed -65 Versions.

SPEED CONTROL

FEATURES

- Highly Integrated Microstepping Driver, Intelligent Variable Speed Controller and NEMA 17 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +48 VDC
- Cost Effective
- Extremely Compact
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- 10-bit Analog Speed Control Input Accepts:
 - 0 to +5 VDC
 - 0 to +10 VDC
 - 4 to 20 mA
 - 0 to 20 mA
 - 15 to 25 kHz PWM
- Automatic Current Reduction
- Electronically Configurable:
 - Motor Run/Hold Current
 - Microstep Resolution
 - Acceleration/Deceleration
 - Initial and Max Velocity
 - Hold Current Delay Time/Motor Settling Delay Time
 - Programmable Filtering for the Start/Stop Input
- Available Options:
 - Long Life Linear Actuators**
 - External Optical Encoder
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- 3 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Fly
- Interface Options:
 - Pluggable Terminal Strip
 - 12.0" (30.5cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

DESCRIPTION

The **MDrive17Plus Speed Control** offers system designers cost effective, programmable velocity control integrated with a NEMA 17 high torque 1.8° brushless step motor and a +12 to +48 volt microstepping driver.

The MDrive17Plus Speed Control features a digital oscillator for accurate velocity control with an output frequency of up to 5 Megahertz. Output frequency will vary with the signal applied to the speed control input and can be limited by the amount specified by the Maximum Velocity parameter.

Speed can be adjusted using three modes of operation: voltage, current and PWM. The ranges are 0 to +5 volts and 0 to +10 volts in voltage mode, 0 to 20 mA and 4 to 20 mA in current mode, and 15 to 25 kHz in PWM mode. This allows the MDrive17-Plus Speed Control to be driven by a wide variety of sensors and control devices.

There are two basic methods for controlling the velocity: bidirectional and unidirectional. By moving the center point, both speed and direction are controlled by a potentiometer or joystick. By setting the center point to zero or the lower end of the potentiometer, only velocity is controlled by the speed control input; direction is controlled by a separate digital input.

The MDrive17Plus Speed Control has 18 setup parameters, which may be configured using the supplied IMS Analog Speed Control GUI, or a user-developed front-end communicating over SPI. The setup parameters enable the user to configure all MDrive operational parameters which are stored in nonvolatile memory.

The versatile, compact MDrive17Plus Speed Control is available in multiple configurations to fit various system

needs. Rotary motor versions come in three lengths and may include an optical encoder, control knob, planetary gearbox or linear slide. Long life Acme screw linear actuators** are also available.

Connector style options give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads or pluggable terminal strip.

new
 MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. See pg 23.

The MDrive17Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

The IMS Analog Speed Control is a software GUI for quick and easy parameter setup of the MDrivePlus Speed Control from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com. The IMS interface is also used to upgrade MDrive-Plus Speed Control firmware.

IMS Analog Speed Control features:

- Easy installation.
- Automatic detection of MDrivePlus version and communication configuration.
- Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Simple screen interface.

** Consult Factory for Availability.

MDrive17Plus SPEED CONTROL

STANDARD SPECIFICATIONS

INPUT VOLTAGE (+V)	Range	+12 to +48 VDC <i>Power supply current requirements = 2A (maximum) per MDrive17Plus. Actual power supply current will depend on voltage and load.</i>	
	Input	0 to +5 VDC*, 0 to +10 VDC, 4 to 20 mA, 0 to 20 mA or 15 to 25 kHz PWM	
SPEED CONTROL	A/D Resolution	10 bit	
	LOGIC INPUT	Start/Stop and Direction	Low Level
		High Level	+2.0 to +5.0 VDC
		Internal Pull-up Resistance (to +3.3 VDC)	20 kΩ
MOTION	Oscillator Frequency (Max)	5 MHz	
	Microstep Resolution	Number of Settings	20
		Steps Per Revolution	200, 400, 800, 1000, 1600, 2000, 3200, 5000, 6400, 10000, 12800, 20000, 25000, 25600, 40000, 50000, 51200, 36000 (0.01 deg/μstep), 21600 (1 arc minute/μstep), 25400 (0.001mm/μstep)
THERMAL	Operating Temperature	Heat Sink	-40° to +85°C (non-condensing)
		Motor	-40° to +100°C (non-condensing)

*10 kΩ potentiometer resistance.

SETUP PARAMETERS

	Function	Range	Units	Default
A1	Analog Input Mode	0 to +5 VDC, 0 to +10 VDC, 4 to 20 mA, 0 to 20 mA, 15 to 25 kHz PWM	—	0 to +5 VDC
ACCL	Acceleration	91 to 1.5 X 10 ⁹	steps/second ²	1,000,000
C	Joystick Center	1 to 1022	counts	0
DB	Analog Deadband	0 to 255	counts	1
DECL	Deceleration	91 to 1.5 X 10 ⁹	steps/second ²	1,000,000

MICROSTEPPING

FEATURES

- Highly Integrated Microstepping Driver and NEMA 23 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 up to +75 VDC*
- Cost Effective
- Extremely Compact
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Optically Isolated Input Options:
 - Universal +5 to +24 VDC Signals, Sourcing or Sinking
 - Differential +5 VDC Signals
- Automatic Current Reduction
- Configurable:
 - Motor Run/Hold Current
 - Motor Direction vs. Direction Input
 - Microstep Resolution
 - Clock Type: Step and Direction, Quadrature, Step Up and Step Down, Clockwise and Counterclockwise
 - Programmable Digital Filtering for Clock and Direction Inputs
- Available Options:
 - Long Life Linear Actuators**
 - Encoder: External Optical or Internal Magnetic
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
 - IP65 Sealed Configuration with M23 Circular Connector¹
- 4 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Fly
- Interface Options:
 - Pluggable Locking Wire Crimp
 - Pluggable Terminal Strip
 - 12.0" (30.5cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

* 12-75 VDC single, double & triple length motors; 12-60 VDC quad length motor.

** Consult Factory for Availability.

¹Not available with Differential Input option.

DESCRIPTION

The **MDrive23Plus Microstepping** high torque integrated motor and step and direction driver is ideal for designers who want the simplicity of a motor with on-board electronics. The integrated electronics of the MDrive23Plus eliminate the need to run motor cabling through the machine, reducing the potential for problems due to electrical noise.

The unsurpassed smoothness and performance delivered by the MDrive23-Plus Microstepping are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive23Plus accepts a broad input voltage range from +12 up to +75 VDC*, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long runs and multiple drive systems. An extended operating range of -40° to +85°C provides long life, trouble free service in demanding environments.

The MDrive23Plus uses a NEMA 23 frame size high torque brushless step motor integrated with a microstepping driver, and accepts up to 20 resolution settings from full to 256 microsteps per full step, including: degrees, metric and arc minutes. These settings may be changed on-the-fly or downloaded and stored in nonvolatile memory with the use of a simple GUI which is provided. This eliminates the need for external switches or resistors. Parameters are changed via an SPI port.

For use in environments where exposure to chemical, dust and liquids may occur, a sealed MDrive23Plus-65 Microstepping

unit with 19-pin M23 circular connector meets IP65 specifications.¹

The versatile MDrive23Plus Microstepping is available in multiple configurations to fit various system needs. Rotary motor versions come in four lengths and may include an encoder, control knob, planetary gearbox or linear slide. Long life Acme screw linear actuators** are also available.

Numerous connector styles give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads, pluggable terminal strip, locking wire crimp connectors, and M23 circular connectors on IP65 sealed versions¹.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. See pg 28.

The MDrive23Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

The IMS Motor Interface software is an easy to install and use GUI for configuring the MDrive23Plus from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com.

The IMS SPI Motor Interface features:

- Easy installation.
- Automatic detection of MDrive version and communication configuration.
- Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Simple screen interfaces.

MOTION CONTROL
 (with optional CANopen)

STANDARD FEATURES

- Highly Integrated Microstepping Driver, Intelligent Motion Controller and NEMA 23 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 up to +75 VDC*
- Cost Effective
- Extremely Compact
- Available Options:
 - Long Life Linear Actuators**
 - Internal Magnetic Encoder for Closed Loop Control
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- 4 Rotary Motor Lengths Available
- Auxiliary Logic Power Supply Input
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Open or Optional Closed Loop Control
- Programmable Motor Run and Hold Currents
- Four +5 to +24 VDC I/O Lines Accept Sourcing or Sinking Outputs
- One 10 Bit Analog Input Selectable: 0 to +10 VDC, 0 to +5 VDC, 0-20 mA, 4-20 mA
- 0 to 5 MHz Step Clock Rate Selectable in 0.59 Hz Increments
- RS-422/485 or Optional CANopen Communications
- 62 Software Addresses for Multi-Drop Communications
- Simple 1 to 2 Character Instructions
- Interface Options:
 - Pluggable Terminal Strip
 - 12.0" (30.5cm) Flying Leads

EXPANDED PLUS² FEATURES

- +24 VDC Tolerant I/O Lines Sourcing or Sinking, Inputs and Outputs:
 - 8 I/O Lines with Electronic Gearing (or)
 - 4 I/O Lines with External/Remote Encoder for Closed Loop Control
- High Spd Position Capture Input or Trip Output
- Pluggable Locking Wire Crimp Interface
- IP65 Sealed Configuration with M12/M23 Circular Connectors

* 12-75 VDC single, double & triple length motors; 12-60 VDC quad length motor.

** Consult Factory for Availability.

DESCRIPTION

The **MDrive23Plus Motion Control** offers system designers a cost effective, full featured programmable motion controller integrated with a NEMA 23 high torque 1.8° brushless step motor and a +12 up to +75 VDC* microstepping driver.

The unsurpassed smoothness and performance delivered by the MDrive23Plus Motion Control are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive23Plus accepts a broad input voltage range from +12 up to +75 VDC*, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long cable runs and multiple drive systems. An extended operating range of -40° to +85°C provides long life, trouble free service in demanding environments.

Standard features of all MDrive23Plus Motion Control include four +5 to +24 volt general purpose I/O lines, one 10 bit analog input, 0 to 5 MHz step clock rate, 20 microstep resolutions up to 51,200 steps per revolution, and full featured easy-to-program instruction set.

Expanded features of MDrive23Plus² versions include up to eight +5 to +24 volt general purpose I/O lines and the capability of electronic gearing by following a rotary or linear axis at an electronically controlled ratio, or an output clock can be generated fixed to the internal step clock.

For use in environments where exposure to chemical, dust and liquids may occur, MDrive23Plus²-65 sealed assembly versions are designed to meet IP65 specifications.

All MDrive23Plus Motion Control are available with optional closed loop control. This increases functionality by

adding stall detection, position maintenance and find index mark.

The closed loop configuration is added via a 512 line (2048 edge) magnetic encoder with index mark, internal to the unit so there is no increase in length. Or, for an expanded choice of line counts and resolutions with MDrive23Plus² versions only, closed loop control is available with an interface to a remotely mounted user-supplied external encoder.

The MDrive communicates over RS-422/485 which allows for point-to-point or multiple unit configurations utilizing one communication port. Addressing and hardware support up to 62 uniquely addressed units communicating over a single line. Baud rate is selectable from 4.8 to 115.2 kbps.

Optional communication protocols include CANopen. The CAN bus is 2.0B active (11 and/or 29 bit) and is capable of all standard frequencies from 10 kHz to 1 MHz. CANopen features include node guarding, heartbeat producer, SDOs and PDOs. Highlights include variable PDO mapping and extended node identifier.

Motor configurations include a single shaft rotary in four lengths, and linear actuators with long life Acme screw**.

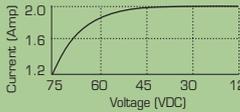

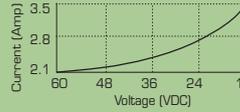

Numerous connector styles give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads, pluggable terminal strip, locking wire crimp connectors, and M12/M23 circular connectors on IP65 sealed versions.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. See pg 33.

The MDrive23Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

MDrive23Plus MOTION CONTROL

STANDARD SPECIFICATIONS (Plus Versions)

INPUT VOLTAGE (+V)	Range	+12 to +75 VDC applicable for motors: - Single length - Double length - Triple length 		+12 to +60 VDC applicable for motor: - Quad length 		
		Power supply current requirements = 2A (maximum)		Power supply current requirements = 3.5A (maximum)		
AUX. LOGIC INPUT VOLTAGE	Range	+12 to +24 VDC Maintains power to control and feedback circuits (only) when input voltage is removed.				
ANALOG INPUT	Resolution	10 Bit				
	Voltage Range	0 to +5 VDC, 0 to +10 VDC, 0-20 mA, 4-20 mA				
GENERAL PURPOSE I/O	Number/Type	4 Sinking Outputs/4 Sourcing or Sinking Inputs				
	Logic Range	Inputs and Outputs Tolerant to +24VDC, Inputs TTL Level Compatible				
	Output Sink Current	Up to 600 mA per Channel				
	Protection	Over Temp, Short Circuit, Transient Over Voltage, Over Voltage, Inductive Clamp				
COMMUNICATION	Type (Standard)	RS-422/485				
	Baud Rate	4.8 to 115.2kbps				
	Type (Optional)	CANopen DSP-402 (V2.0), DS-301 (V3.0), 2.OB Active				
	ID	11 and/or 29 Bit				
	Isolation	Galvanic				
	Features	Node Guarding, Heartbeat, SDOs, PDOs (Variable Mapping)				
MOTION	Open Loop Configuration	Number of Settings	20			
		Steps Per Revolution	200, 400, 800, 1000, 1600, 2000, 3200, 5000, 6400, 10000, 12800, 20000, 25000, 25600, 40000, 50000, 51200, 36000 (0.01 deg/μstep), 21600 (1 arc minute/μstep), 25400 (0.001mm/μstep)

CONNECTIVITY

new

QuickStart Kit

For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

new

Communication Converters

Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set/program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0" (3.6m).

Mates to connector:

- 10-Pin IDCMD-CC400-001
- 10-Pin Wire CrimpMD-CC402-001
- DB9 CANopenMD-CC500-000*
- 5-Pin M12 CANopen (sealed version)MD-CC500-000*
- 5-Pin M12 RS-422/485 (sealed version)MD-CC401-001

*Requires mating connector adapter and power supply, not supplied.

Prototype Development Cables

Speed test/development with pre-wired mating connectors that have ying leads other end. Length 10.0' (3.0m).

Mates to connector:

- 10-Pin Wire CrimpPD10-1434-FL3
- 14-Pin Wire CrimpPD14-2334-FL3
- 2-Pin Wire CrimpPD02-2300-FL3

For IP65 sealed versions, single-ended cordsets are PVC jacketed with foil shield and unconnected drain wire. Length 13.0' (4.0m).

- 19-Pin M23
- Straight TerminationMD-CS100-000
- Right Angle Termination.....MD-CS101-000

new

Mating Connector Kits

Use to build your own cables. Kit contains 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.

Mates to connector:

- 10-Pin Wire CrimpCK-02
- 14-Pin Wire CrimpCK-09
- 2-Pin Wire CrimpCK-04

Kit contains 5 mating connectors that press fit onto ribbon cable. Cable not supplied.

- 10-Pin IDCCK-01

OPTIONS

Linear Actuator**

The MDrive23Plus is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder

All MDrive23Plus Motion Control versions are available with an optional internal 512-line (2048 count) magnetic encoder with index mark.

Remote Encoder (Plus² versions only)

MDrive23Plus² Motion Control versions are available with differential encoder inputs for use with a remote encoder (not supplied).

Control Knob†

The MDrive23Plus is available with a factory-mounted rear control knob for manual shaft positioning.

Planetary Gearbox

Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive23Plus. Refer to details and part numbers beginning on page 69.

Linear Slide

Integrated linear slides are available factory installed for precision linear movement. Screw leads are 0.1", 0.2", 0.5" or 1.0" of travel per rev. Slides are 12.0" (30.5cm) to 36.0" (91.44cm) long, or contact the factory for custom lengths. For more details, go to page 74.

** Consult Factory for Availability.

† Not Available with Sealed -65 Versions.

- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- 10-bit Analog Speed Control Input Accepts:
 - 0 to +5 VDC
 - 0 to +10 VDC
 - 4 to 20 mA
 - 0 to 20 mA
 - 15 to 25 kHz PWM
- Automatic Current Reduction
- Electronically Configurable:
 - Motor Run/Hold Current
 - Microstep Resolution
 - Acceleration/Deceleration
 - Initial and Max Velocity
 - Hold Current Delay Time/Motor Settling Delay Time
 - Programmable Filtering for the Start/Stop Input
- Available Options:
 - Long Life Linear Actuators**
 - External Optical Encoder
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- 4 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Fly
- Interface Options:
 - Pluggable Terminal Strip
 - 12.0" (30.5cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

* 12-75 VDC single, double & triple length motors; 12-60 VDC quad length motor.

**Consult Factory for Availability.

DESCRIPTION

The **MDrive23Plus Speed Control** offers system designers cost effective, programmable velocity control integrated with a NEMA 23 high torque 1.8° brushless step motor and a +12 up to +75 VDC* microstepping driver.

The MDrive23Plus Speed Control features a digital oscillator for accurate velocity control with an output frequency of up to 5 Megahertz. Output frequency will vary with the signal applied to the speed control input and can be limited by the amount specified by the Maximum Velocity parameter.

Speed can be adjusted using three modes of operation: voltage, current and PWM. The ranges are 0 to +5 volts and 0 to +10 volts in voltage mode, 0 to 20 mA and 4 to 20 mA in current mode, and 15 to 25 kHz in PWM mode. This allows the MDrive23-Plus Speed Control to be driven by a wide variety of sensors and control devices.

There are two basic methods for controlling the velocity: bidirectional and unidirectional. By moving the center point, both speed and direction are controlled by a potentiometer or joystick. By setting the center point to zero or the lower end of the potentiometer, only velocity is controlled by the speed control input; direction is controlled by a separate digital input.

The MDrive23Plus Speed Control has 18 setup parameters, which may be configured using the supplied IMS Analog Speed Control GUI, or a user-developed front-end communicating over SPI. The setup parameters enable the user to configure all MDrive operational parameters which are stored in nonvolatile memory.

The versatile, compact MDrive23Plus Speed Control is available in multiple configurations to fit various system

needs. Rotary motor versions come in four lengths and may include an optical encoder, control knob, planetary gearbox or linear slide. Long life Acme screw linear actuators** are also available.

Connector style options give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads or pluggable terminal strip.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. *See pg 37.*

The MDrive23Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

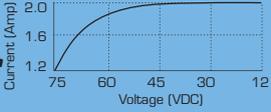

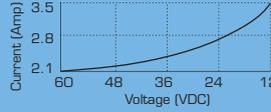

The IMS Analog Speed Control is a software GUI for quick and easy parameter setup of the MDrivePlus Speed Control from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com. The IMS interface is also used to upgrade MDrive-Plus Speed Control firmware.

IMS Analog Speed Control features:

- Easy installation.
- Automatic detection of MDrivePlus version and communication configuration.
- Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Simple screen interface.

MDrive23Plus SPEED CONTROL

STANDARD SPECIFICATIONS

INPUT VOLTAGE (+V)	Range	+12 to +75 VDC applicable for motors: - Single length - Double length - Triple length		+12 to +60 VDC applicable for motor: - Quad length

MDRIVE 34™ MOTOR+DRIVER Plus MICROSTEPPING

FEATURES

- Highly Integrated Microstepping Driver and NEMA 34 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +75 VDC
- Cost Effective
- Extremely Compact
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Optically Isolated Input Options:
 - Universal +5 to +24 VDC Signals, Sourcing or Sinking
 - Differential +5 VDC Signals
- Automatic Current Reduction
- Configurable:
 - Motor Run/Hold Current
 - Motor Direction vs. Direction Input
 - Microstep Resolution
 - Clock Type: Step and Direction, Quadrature, Step Up and Step Down
 - Programmable Digital Filtering for Clock and Direction Inputs
- Available Options:
 - Long Life Linear Actuators**
 - Internal Optical Encoder
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- 3 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Fly
- Interface Options:
 - Pluggable Locking Wire Crimp
 - 12.0" (30.5cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

**Consult Factory for Availability.

DESCRIPTION

The **MDrive34Plus Microstepping** high torque integrated motor and step and direction driver is ideal for designers who want the simplicity of a motor with on-board electronics. The integrated electronics of the MDrive34Plus eliminate the need to run motor cabling through the machine, reducing the potential for problems due to electrical noise.

The unsurpassed smoothness and performance delivered by the MDrive34-Plus Microstepping are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive34Plus accepts a broad input voltage range from +12 to +75 VDC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long runs and multiple drive systems. An extended operating range of -40° to +75°C provides long life, trouble free service in demanding environments.

The MDrive34Plus uses a NEMA 34 frame size high torque brushless step motor integrated with a microstepping driver, and accepts up to 20 resolution settings from full to 256 microsteps per full step, including: degrees, metric and arc minutes. These settings may be changed on-the-fly or downloaded and stored in nonvolatile memory with the use of a simple GUI which is provided. This eliminates the need for external switches or resistors. Parameters are changed via an SPI port.

The versatile MDrive34Plus Microstepping is available in multiple configurations to fit various system needs. Rotary motor versions come in three lengths and may include an encoder, control knob, planetary gearbox or linear slide. Long life Acme screw linear actuators** are also available.

Connector style options give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads or locking wire crimp connectors.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. See pg 42.

The MDrive34Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

The IMS Motor Interface software is an easy to install and use GUI for configuring the MDrive34Plus from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com.

- The IMS SPI Motor Interface features:
- Easy installation.
 - Automatic detection of MDrive version and communication configuration.
 - Will not set out-of-range values.
 - Tool-tips display valid range setting for each option.
 - Simple screen interfaces.

ORDER INFORMATION — MDrive34Plus Microstepping

CONNECTIVITY

QuickStart Kit
For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

Communication Converters
Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0' (3.6m).
Mates to connector:
10-Pin IDCMD-CC300-001
12-Pin Wire CrimpMD-CC303-001

Prototype Development Cables
Speed test/development with pre-wired mating connectors that have ying leads other end. Length 10.0' (3.0m).
Mates to connector:
12-Pin Wire CrimpPD12-1434-FL3
10-Pin Wire CrimpPD10-3400-FL3
2-Pin Wire CrimpPD02-3400-FL3

Mating Connector Kits
Use to build your own cables. Kits contain 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.
Mates to connector:
12-Pin Wire CrimpCK-03
10-Pin Wire CrimpCK-02
2-Pin Wire CrimpCK-05
Kit contains 5 mating connectors that press fit onto ribbon cable. Cable not supplied.
10-Pin IDCCK-01

OPTIONS

Linear Actuator**
The MDrive34Plus is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder
Internal optical encoders are offered factory-mounted with the MDrive34Plus Microstepping. Refer to the Encoder Specifications section for available styles, line counts and part numbers. All encoders come with an index mark.

Control Knob
The MDrive34Plus is available with a factory-mounted rear control knob for manual shaft positioning.

Planetary Gearbox
Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive34Plus. Refer to details and part numbers beginning on page 69.

Linear Slide
Integrated linear slides are available factory installed for precision linear movement. Screw leads are 0.1", 0.2", 0.5" or 1.0" of travel per rev. Slides are 12.0" (30.5cm) to 42.0" (106.7cm) long, or contact the factory for custom lengths. For more details, go to page 76.

** Consult Factory for Availability.

MDRIVE 34™ MOTOR+DRIVER

Plus

MOTION CONTROL
(with optional CANopen)

STANDARD FEATURES

- Highly Integrated Microstepping Driver, Intelligent Motion Controller and NEMA 34 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +75 VDC
- Cost Effective
- Extremely Compact
- Available Options:
 - Long Life Linear Actuators**
 - Internal Optical Encoder for Closed Loop Control
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- 3 Rotary Motor Lengths Available
- Auxiliary Logic Power Supply Input
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Open or Optional Closed Loop Control
- Programmable Motor Run and Hold Currents
- Four +5 to +24 VDC I/O Lines Accept Sourcing or Sinking Outputs
- One 10 Bit Analog Input Selectable: 0 to +10VDC, 0 to +5VDC, 0-20 mA, 4-20 mA
- 0 to 5MHz Step Clock Rate Selectable in 0.59Hz Increments
- RS-422/485 or Optional CANopen Communications
- 62 Software Addresses for Multi-Drop Communications
- Simple 1 to 2 Character Instructions
- Interface Options:
 - 12.0" (30.5cm) Flying Leads

EXPANDED PLUS² FEATURES

- 8 I/O Lines, +24 VDC Tolerant Sourcing or Sinking, Inputs and Outputs
- Electronic Gearing
- High Speed Position Capture Input or Trip Output
- Pluggable Locking Wire Crimp Interface

DESCRIPTION

The **MDrive34Plus Motion Control** offers system designers a cost effective, full featured programmable motion controller integrated with a NEMA 34 high torque 1.8° brushless step motor and a +12 to +75 volt microstepping driver.

The unsurpassed smoothness and performance delivered by the MDrive34Plus Motion Control are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive34Plus accepts a broad input voltage range from +12 to +75 VDC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long cable runs and multiple drive systems. An extended operating range of -40° to +75°C provides long life, trouble free service in demanding environments.

Standard features of all MDrive34Plus Motion Control include four +5 to +24 volt general purpose I/O lines, one 10 bit analog input, 0 to 5MHz step clock rate, 20 microstep resolutions up to 51,200 steps per revolution, and full featured easy-to-program instruction set.

Expanded features of MDrive34Plus² versions include up to eight +5 to +24 volt general purpose I/O lines and the capability of electronic gearing by following a rotary or linear axis at an electronically controlled ratio, or an output clock can be generated fixed to the internal step clock.

All MDrive34Plus Motion Control are available with optional closed loop control. This increases functionality by adding stall detection, position maintenance and find index mark.

The closed loop configuration is added via a 512 line (2048 edge) optical encoder with index mark, internal to the unit so there is no increase in length. Or, for an expanded choice of line counts and resolutions with MDrive34Plus² versions only, closed loop control is available with an interface to a remotely mounted user-supplied external encoder.

The MDrive communicates over RS-422/485 which allows for point-to-point or multiple unit configurations utilizing one communication port. Addressing and hardware support up to 62 uniquely addressed units communicating over a single line. Baud rate is selectable from 4.8 to 115.2kbps.

Optional communication protocols include CANopen. The CAN bus is 2.0B active (11 and/or 29 bit) and is capable of all standard frequencies from 10kHz to 1MHz. CANopen features include node guarding, heartbeat producer, SDOs and PDOs. Highlights include variable PDO mapping and extended node identifier.

Motor configurations include a single shaft rotary in three lengths, and linear actuators with long life Acme screw**.

Interface connections are accomplished for standard MDrivePlus versions using 12.0" (30.5cm) flying leads, and for expanded MDrive34Plus² versions using pluggable locking wire crimp connectors.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. *See pg 47.*

The MDrive34Plus is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

**Consult Factory for Availability.

MDrive34Plus MOTION CONTROL

STANDARD SPECIFICATIONS (Plus Versions)

INPUT VOLTAGE (+V)	Range	+12 to +75 VDC Power supply current requirements = 4A (maximum) per MDrive34Plus. Actual power supply current will depend on voltage and load.		
	AUX. LOGIC INPUT VOLTAGE	Range	+12 to +24 VDC Maintains power to control and feedback circuits (only) when input voltage is removed.	
ANALOG INPUT	Resolution	10 Bit

ORDER INFORMATION — MDrive34Plus Motion Control

CONNECTIVITY

NEW

QuickStart Kit

For rapid design verification, all-inclusive QuickStart Kits have communication converter; prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

NEW

Communication Converters

Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set/program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0" (3.6m).

Mates to connector:

- 10-Pin IDCMD-CC400-001
- 10-Pin Wire CrimpMD-CC402-001
- DB9 CANopenMD-CC500-001 *

*Requires mating connector adapter and power supply, not supplied.

Prototype Development Cables

Speed test/development with pre-wired mating connectors that have varying leads other end. Length 10.0' (3.0m).

Mates to connector:

- 10-Pin Wire CrimpPD10-1434-FL3
- 14-Pin Wire CrimpPD14-2334-FL3
- 20-Pin Wire CrimpPD20-3400-FL3
- 2-Pin Wire CrimpPDO2-3400-FL3

NEW

Mating Connector Kits

Use to build your own cables. Kits contain 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.

Mates to connector:

- 10-Pin Wire CrimpCK-02
- 14-Pin Wire CrimpCK-09
- 20-Pin Wire CrimpCK-11
- 2-Pin Wire CrimpCK-05

Kit contains 5 mating connectors that press fit onto ribbon cable. Cable not supplied.

- 10-Pin IDCCK-01

OPTIONS

Linear Actuator**

The MDrive34Plus is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder

All MDrive34Plus Motion Control versions are available with an optional internal 512-line (2048 count) optical encoder with index mark.

Remote Encoder (Plus² versions only)

MDrive34Plus² Motion Control versions are available with differential encoder inputs for use with a remote encoder (not supplied).

Control Knob

The MDrive34Plus Motion Control is available with a factory-mounted rear control knob for manual shaft positioning.

Planetary Gearbox

Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive34Plus. Refer to details and part numbers beginning on page 69.

Linear Slide

Integrated linear slides are available factory installed for precision linear movement. Screw leads are 0.1", 0.2", 0.5" or 1.0" of travel per rev. Slides are 12.0" (30.5cm) to 42.0" (106.7cm) long, or contact the factory for custom lengths. For more details, go to page 76.

** Consult Factory for Availability.

M DRIVE 34™ MOTOR+DRIVER 34™ *Plus2* SPEED CONTROL

FEATURES

- Highly Integrated Microstepping Driver, Intelligent Variable Speed Controller and NEMA 34 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: +12 to +75 VDC
- Cost Effective
- Extremely Compact
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- 2 Selectable 10-bit Analog Speed Control Inputs Accept:
 - 0 to +5 VDC
 - 0 to +10 VDC
 - 4 to 20 mA
 - 0 to 20 mA
 - 15 to 25 kHz PWM
- Automatic Current Reduction
- Electronically Configurable:
 - Motor Run/Hold Current
 - Microstep Resolution
 - Acceleration/Deceleration
 - Initial and Max Velocity
 - Hold Current Delay Time/Motor Settling Delay Time
 - Programmable Filtering for the Start/Stop Input
- Available Options:
 - Long Life Linear Actuators**
 - Internal Optical Encoder
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - Linear Slide
- 3 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Fly
- Interface Options:
 - Pluggable Locking Wire Crimp
 - 12.0" (30.5cm) Flying Leads
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

DESCRIPTION

The **MDrive34Plus² Speed Control** offers system designers cost effective, programmable velocity control integrated with a NEMA 34 high torque 1.8° brushless step motor and a +12 to +75 volt microstepping driver.

The MDrive34Plus² Speed Control features a digital oscillator for accurate velocity control with an output frequency of up to 5 Megahertz. Output frequency will vary with the signal applied to the speed control input and can be limited by the amount specified by the Maximum Velocity parameter.

Speed can be adjusted using three modes of operation: voltage, current and PWM. The ranges are 0 to +5 volts and 0 to +10 volts in voltage mode, 0 to 20 mA and 4 to 20 mA in current mode, and 15 to 25 kHz in PWM mode. Voltage and current modes provide two configurable speed control inputs, SPEED A1 & SPEED A2, which may be preset and digitally selected.

There are two basic methods for controlling the velocity: bidirectional and unidirectional. By moving the center point, both speed and direction are controlled by a potentiometer or joystick. By setting the center point to zero or the lower end of the potentiometer, only velocity is controlled by the speed control input; direction is controlled by a separate digital input.

The MDrive34Plus² Speed Control has 21 setup parameters, which may be configured using the supplied IMS Analog Speed Control GUI, or a user-developed front-end communicating over SPI. The setup parameters enable the user to configure all MDrive operational parameters which are stored in nonvolatile memory.

The versatile, compact MDrive34Plus² Speed Control is available in multiple

configurations to fit various system needs. Rotary motor versions come in three lengths and may include an optical encoder, control knob, planetary gearbox or linear slide. Long life Acme screw linear actuators** are also available.

Connector style options give you choices for the best fit and features. Select from 12.0" (30.5cm) flying leads or locking wire crimp connectors.

MDrivePlus connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits** to **individual interfacing cables** and **mating connector kits** to build your own cables. *See pg 52.*

The MDrive34Plus² is a compact, powerful and cost effective motion control solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

The IMS Analog Speed Control is a software GUI for quick and easy parameter setup of the MDrivePlus Speed Control from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com. The IMS interface is also used to upgrade MDrivePlus Speed Control firmware.

IMS Analog Speed Control features:

- Easy installation.
- Automatic detection of MDrivePlus version and communication configuration.
- Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Simple screen interface.

** Consult Factory for Availability.

MDrive34Plus² SPEED CONTROL

STANDARD SPECIFICATIONS

INPUT VOLTAGE (+V)	Range	+12 to +75 VDC <i>Power supply current requirements = 4A (maximum) per MDrive34Plus. Actual power supply current will depend on voltage and load.</i>		
SPEED CONTROL	Input	SPEED A1	0 to +5 VDC*, 0 to +10 VDC*, 4 to 20 mA, 0 to 20 mA	
		SPEED A2	0 to +5 VDC*, 0 to +10 VDC*, 4 to 20 mA, 0 to 20 mA	
	A/D Resolution	10 bit		
LOGIC INPUT	Optically Isolated Inputs	SPEED A1/SPEED A2 Select or PWM (15 to 25 kHz), Start/Stop, Direction		
	Voltage Range	Sourcing or Sinking	+5 to +24 VDC	
LOGIC OUTPUTS	Step Clock/Direction	Open Drain	Drain Source (Max)	+100 VDC
			Continuous Drain Current	100 mA
		Output Pulse Width software configurable	100 nSec to 12.8 µSec	
MOTION	Oscillator Frequency (Max)	5 MHz		
	Microstep Resolution	Number of Settings	20	
		Steps Per Revolution	200, 400, 800, 1000, 1600, 2000, 3200, 5000, 6400, 10000, 12800, 20000, 25000, 25600, 40000, 50000, 51200, 36000 (0.01 deg/µstep), 21600 (1 arc minute/µstep), 25400 (0.001mm/µstep)	
THERMAL	Operating Temperature	Heat Sink	-40° to +75°C (non-condensing)	
		Motor	-40° to +90°C (non-condensing)	

*10 kΩ potentiometer resistance.

SETUP PARAMETERS

	Function	Range	Units	Default
ACCL	Acceleration	91 to 1.5 X 10 ⁹	steps/second ²	1,000,000
C**	Joystick Center	1 to 1022	counts	0
CLK OUT	Clock Out	None, Step/Dir, Quadrature, Up/Down	—	None
DB**	Analog Deadband	0 to 255	counts	1
DECL	Deceleration	91 to 1.5 X 10 ⁹	steps/second ²	1,000,000
DIR	Motor Direction Override	Clockwise (CW) / Counterclockwise (CCW)	—	CW
FAULT	Fault/Checksum Error	Error Code	—	None
FS**	Analog Full Scale	1 to 1023	counts	1023
HCDT	Hold Current Delay Time	HCDT + MSDT ≤ 65535	milliseconds	500
IF**	Analog Input Filter	1 to 1000	counts	1
IMODE	Source	SPEED A1/SPEED A2 or PWM 15 to 25 kHz	—	A1&A2
	Analog Input (SPEEDS A1&A2)	0 to +5 VDC, 0 to +10 VDC, 4 to 20 mA, 0 to 20 mA	volts or current	0 to +5 VDC
MHC	Motor Hold Current	0 to 100	percent	5
MRC	Motor Run Current	1 to 100	percent	25
MSDT	Motor Settling Delay Time	MSDT + HCDT ≤ 65535	milliseconds	0
MSEL	Microstep Resolution	1, 2, 4, 5, 8, 10, 16, 25, 32, 50, 64, 100, 108, 125, 127, 128, 180, 200, 250, 256	µsteps per full step	256
STEPW	Step Width	0 (Square Wave), 100 nSec to 12.8 µSec	nSec	550 nSec
SSD	Stop/Start Debounce	0 to 255	milliseconds	0
VI	Initial Velocity	0 to <VM	steps/second	1000
VM	Maximum Velocity	VI to 5,000,000	steps/second	768,000
TEMP	Warning Temperature	0 to 85°C	°C	80°C
USER ID	User ID	Customizable	1–3 characters	IMS

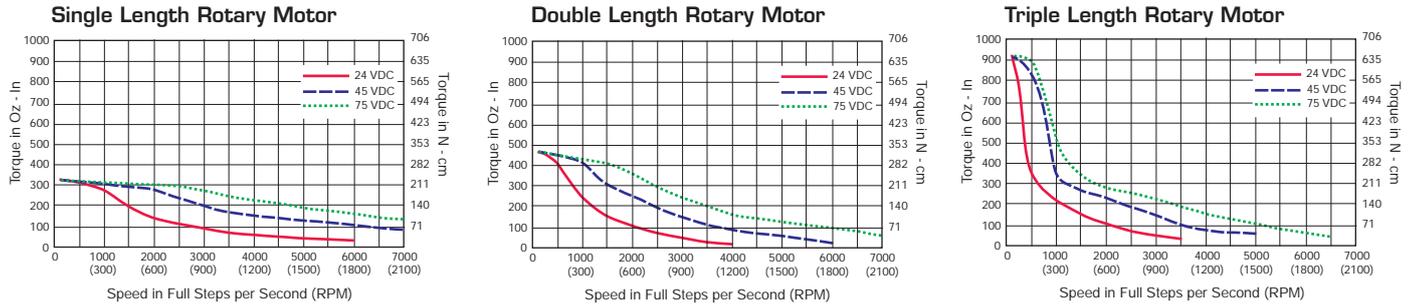

**Separate analog inputs for SPEEDS A1 & A2.

All parameters are set using the supplied IMS SPI Motor Interface GUI and may be changed on-the-fly. An optional Communication Converter is recommended with first orders.

ORDER INFORMATION — MDrive34Plus Speed Control

CONNECTIVITY

new QuickStart Kit
For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

new Communication Converters
Electrically isolated, in-line converters pre-wired with mating connectors to conveniently set/program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0" (3.6m).
Mates to connector:
10-Pin IDC MD-CC300-001
10-Pin Wire Crimp MD-CC302-001

Prototype Development Cables
Speed test/development with pre-wired mating connectors that have varying leads other end. Length 10.0' (3.0m).
Mates to connector:
12-Pin Wire Crimp PD12B-2334-FL3
20-Pin Wire Crimp PD20B-3400-FL3
2-Pin Wire Crimp PD02-3400-FL3

new Mating Connector Kits
Use to build your own cables. Kits contain 5 mating shells with pins. Cable not supplied. Manufacturer's crimp tool recommended.
Mates to connector:
10-Pin Wire Crimp CK-02
12-Pin Wire Crimp CK-08
20-Pin Wire Crimp CK-11
2-Pin Wire Crimp CK-05
Kit contains 5 mating connectors that press fit onto ribbon cable. Cable not supplied.
10-Pin IDC CK-01

OPTIONS

Linear Actuator**
The MDrive34Plus² is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder
Internal optical encoders, single-end or differential[†] styles, are offered factory-mounted with MDrive34Plus² Speed Control products. Refer to the table below.

Line Count	100	200	250	256	400	500	512	1000	1024
Single-End part#	E1	E2	E3	EP	E4	E5	EQ	E6	ER
Differential part# [†]	EA	EB	EC	EW	ED	EH	EX	EJ	EY

[†]MDrives with pluggable interface available with Differential Encoder only.

Control Knob
The MDrive34Plus² Speed Control is available with a factory-mounted rear control knob for manual shaft positioning.

Planetary Gearbox
Efficient, low maintenance planetary gearboxes are offered assembled with the MDrive34Plus. Refer to details and part numbers beginning on page 69.

Linear Slide
Integrated linear slides are available factory installed for precision linear movement. Screw leads are 0.1", 0.2", 0.5" or 1.0" of travel per rev. Slides are 12.0" (30.5cm) to 42.0" (106.7cm) long, or contact the factory for custom lengths. For more details, go to page 76.

**Consult Factory for Availability.

MDRIVE 34™ MOTOR+DRIVER AC Plus MICROSTEPPING

FEATURES

- Highly Integrated Microstepping Driver and NEMA 34 High Torque 1.8° Brushless Step Motor
- Advanced 2nd Generation Current Control for Exceptional Performance and Smoothness
- Single Supply: 120 or 240 VAC
- Cost Effective
- Extremely Compact
- High Positioning Accuracy
- No Tuning Required
- Stable at Low Speeds
- No Dithering at Zero Speed
- High Starting Torque
- Allows for Greater Inertia Mismatch
- Built-in Regeneration Circuitry
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Optically Isolated Logic Inputs will Accept +5 to +24 VDC Signals, Sourcing or Sinking
- Automatic Current Reduction
- Configurable:
 - Motor Run/Hold Current
 - Motor Direction vs. Direction Input
 - Microstep Resolution
 - Clock Type: Step and Direction, Quadrature, Step Up and Step Down
 - Programmable Digital Filtering for Clock and Direction Inputs
- Available Options:
 - Long Life Linear Actuators**
 - Internal Differential Optical Encoder
 - Integrated Planetary Gearbox
 - Control Knob for Manual Positioning
 - IP65 Sealed Configuration
 - Linear Slide
- 3 Rotary Motor Lengths Available
- Setup Parameters May Be Switched On-The-Fly
- Standard Industrial Connectors:
 - Circular 19-Pin M23
 - Circular 3-Pin Euro AC
- Graphical User Interface (GUI) for Quick and Easy Parameter Setup

DESCRIPTION

The **MDrive34AC Plus Microstepping** high torque integrated motor and step and direction driver is ideal for designers who want the simplicity of a motor with on-board electronics. The integrated electronics of the MDrive34AC Plus eliminate the need to run motor cabling through the machine, reducing the potential for problems due to electrical noise.

The unsurpassed smoothness and performance delivered by the MDrive34AC Plus Microstepping are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive34AC Plus accepts a broad input voltage range from 95 to 264 VAC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long runs and multiple drive systems. An extended operating range of -40° to +75°C provides long life, trouble free service in demanding environments.

The MDrive34AC Plus uses a NEMA 34 frame size high torque brushless step motor combined with a microstepping driver, and accepts up to 20 resolution settings from full to 256 microsteps per full step, including: degrees, metric and arc minutes. These settings may be changed on-the-fly or downloaded and stored in nonvolatile memory with the use of a simple GUI which is provided. This eliminates the need for external switches or resistors. Parameters are changed via an SPI port.

For use in environments where exposure to chemical, dust and liquids may occur, a sealed MDrive34AC Plus Microstepping

unit with circular connectors meets IP65 specifications.**

The versatile MDrive34AC Plus Microstepping is available in multiple configurations to fit various system needs. Three rotary motor lengths are available and may include an internal optical encoder, a control knob for manual positioning, an integrated planetary gearbox or a linear slide. Long life Acme screw linear actuator versions are also available.**

Interface connections are accomplished using standard industrial circular connectors. And connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits to individual interfacing cables**. See pg 56.

The MDrive34AC Plus is a compact, powerful and cost effective solution that will reduce system cost, design and assembly time for a large range of brushless step motor applications.

CONFIGURING

The IMS Motor Interface software is an easy to install and use GUI for configuring the MDrive34AC Plus from a computer's USB port. GUI access is via the IMS SPI Motor Interface available at www.imshome.com.

The IMS SPI Motor Interface features:

- Easy installation.
- Automatic detection of MDrive version and communication configuration.
- Will not set out-of-range values.
- Tool-tips display valid range setting for each option.
- Simple screen interfaces.

**Consult Factory for Availability.

 - Long Life Linear Actuators**
 - Integral Optical Encoder for Closed Loop Control
 - External/Remote Encoder (not supplied) for Closed Loop Control
 - Control Knob for Manual Positioning
 - Integrated Planetary Gearbox
 - IP65 Sealed Configuration
 - Linear Slide
- 3 Motor Lengths Available
- Auxiliary Logic Power Supply Input
- Up to 5 MHz Step Clock Rate
- 20 Microstep Resolutions up to 51,200 Steps Per Rev Including: Degrees, Metric, Arc Minutes
- Open or Optional Closed Loop Control
- Programmable Motor Current
- Up to Eight +24 VDC Tolerant I/O Lines, Sourcing or Sinking
- One 10 Bit Analog Input Selectable: 0 to +5 VDC, 0 to +10 VDC, 0-20 mA, 4-20 mA
- RS-422/485 or Optional CANopen Communications
- 62 Software Addresses for Multi-Drop Communications
- High Speed Position Capture Input or Trip Output
- Electronic Gearing

DESCRIPTION

The **MDrive34AC Plus2 Motion Control** system offers designers a cost effective, full featured programmable motion controller integrated with a NEMA 34 high torque 1.8° brushless step motor and a microstepping driver operating at 120 or 240 VAC.

Unsurpassed smoothness and performance delivered by the MDrive34AC are achieved through IMS's advanced 2nd generation current control. By applying innovative techniques to control current flow through the motor, resonance is significantly dampened over the entire speed range and audible noise is reduced.

The MDrive34AC accepts a broad input voltage range from 95 to 264 VAC, delivering enhanced performance and speed. Oversized input capacitors are used to minimize power line surges, reducing problems that can occur with long cable runs and multiple drive systems. An extended operating range of -40° to +75°C provides long life, trouble free service in demanding environments.

The MDrive34AC Plus2 Motion Control system adds a versatile array of functions by combining a full featured programmable motion controller with our compact and cost effective MDrive34AC Microstepping products, adding little cost and no increase in size. Standard offerings include up to 8 general purpose I/O lines (sourcing or sinking) that operate to +24 VDC, one 10 bit analog input, electronic gearing, high speed position capture input/trip output, microstep resolutions up to 51,200 steps per revolution, 0 to 5 MHz step clock rate, and a full featured easy-to-program instruction set.

The MDrive34AC Plus2 Motion Control system communicates over RS-422/485 which allows for point-to-point or multiple unit configurations utilizing one communication port. Addressing and hardware support multiple uniquely addressed units communicating over a single line.

Optional communication protocols include CANopen. The CAN bus is 2.0B active (11 and/or 29 bit) and is capable of all standard frequencies from 10 kHz to 1 MHz. CANopen features include node guarding, heartbeat producer, SDOs and PDOs. Highlights include variable PDO mapping and extended node identifier.

The MDrive34AC Plus2 Motion Control is available with optional closed loop control. This increases functionality by adding stall detection, position maintenance and find index mark.

The closed loop configuration is added via a 512 line (2048 edge) optical encoder with index mark, internal to the MDrive34AC so there is no increase in length. Or, for an expanded choice of line counts and resolutions, closed loop control is available with an interface to a remotely mounted user-supplied external encoder.

In addition to encoder options, the MDrive34AC Plus2 Motion Control has the capability of electronic gearing by following a rotary or linear axis at an electronically controlled ratio, or an output clock can be generated fixed to the internal step clock.

A sealed version designed to meet IP65 specifications is also available. The sealed assembly allows the MDrive34AC to be used in environments where exposure to chemical, dust and liquids may occur.

Three rotary motor lengths are available as are linear actuators with long life Acme screw**.

Interface connections are accomplished using standard industrial circular connectors. And connectivity has never been easier with options ranging from **all-inclusive QuickStart Kits to individual interfacing cables**. See pg 60.

**Consult Factory for Availability.

CONNECTIVITY

QuickStart Kit
For rapid design verification, all-inclusive QuickStart Kits have communication converter, prototype development cable(s), instructions and CD for MDrivePlus initial functional setup and system testing.

Communication Converter
Electrically isolated, in-line converter pre-wired with mating connector to conveniently set/program communication parameters for a single MDrivePlus via a PC's USB port. Length 12.0' (3.6m).
Mates to connector:
5-Pin M12MD-CC401-001
5-Pin M12 CANopenMD-CC500-000*
*Requires mating connector adapter and power supply, not supplied.

Prototype Development Cables
Speed test/development with pre-wired mating connectors that have varying leads other end. Single-ended cordsets are PVC jacketed with foil shield and unconnected drain wire. Length 13.0' (4.0m).
Mates to connector:
19-Pin M23
Straight TerminationMD-CS100-000
Right Angle TerminationMD-CS101-000
3-Pin Euro AC
Straight TerminationMD-CS200-000
Right Angle TerminationMD-CS201-000

** Consult Factory for Availability.
‡ Not Available with Sealed -65 Versions.

Connectivity details: www.imshome.com/cables_cordsets.html

OPTIONS

Linear Actuator**
The MDrive34AC Plus² is offered with numerous linear actuator styles and options to satisfy a broad range of linear motion applications. Contact the factory for details or see: www.imshome.com/mdriveplus_linear_actuator.html

Internal Encoder
An internal 512-line (2048 count) differential optical encoder with index mark is available factory-mounted.

Remote Encoder
This MDrivePlus Motion Control is offered with differential encoder inputs for use with a remote encoder (not supplied).

Control Knob‡
For manual shaft positioning, a factory-mounted rear control knob is available.

Planetary Gearbox
Efficient, low maintenance planetary gearboxes are offered factory-mounted. Refer to details and part numbers beginning on page 69.

Linear Slide
Integrated linear slides are available factory installed for precision linear movement. Screw leads are 0.1", 0.2", 0.5" or 1.0" of travel per rev. Slides are 12.0" (30.5cm) to 42.0" (106.7cm) long, or contact the factory for custom lengths. For more details, go to page 76.

Warranty

TWENTY-FOUR MONTH LIMITED WARRANTY

Intelligent Motion Systems, Inc. ("IMS"), warrants only to the purchaser of the Product from IMS (the "Customer") that the product purchased from IMS (the "Product") will be free from defects in materials and workmanship under the normal use and service for which the Product was designed for a period of 24 months from the date of purchase of the Product by the Customer. Customer's exclusive remedy under this Limited Warranty shall be the repair or replacement, at Company's sole option, of the Product, or any part of the Product, determined by IMS to be defective. In order to exercise its warranty rights, Customer must notify Company in accordance with the instructions described under the heading "Obtaining Warranty Service."

This Limited Warranty does not extend to any Product damaged by reason of alteration, accident, abuse, neglect or misuse or improper or inadequate handling; improper or inadequate wiring utilized or installed in connection with the Product; installation, operation or use of the Product not made in strict accordance with the specifications and written instructions provided by IMS; use of the Product for any purpose other than those for which it was designed; ordinary wear and tear; disasters or Acts of God; unauthorized attachments, alterations or modifications to the Product; the misuse or failure of any item or equipment connected to the Product not supplied by IMS; improper maintenance or repair of the Product; or any other reason or event not caused by IMS.

IMS HEREBY DISCLAIMS ALL OTHER WARRANTIES, WHETHER WRITTEN OR ORAL, EXPRESS OR IMPLIED BY LAW OR OTHERWISE, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE. CUSTOMER'S SOLE REMEDY FOR ANY DEFECTIVE PRODUCT WILL BE AS STATED ABOVE, AND IN NO EVENT WILL IMS BE LIABLE FOR INCIDENTAL, CONSEQUENTIAL, SPECIAL OR INDIRECT DAMAGES IN CONNECTION WITH THE PRODUCT.

This Limited Warranty shall be void if the Customer fails to comply with all of the terms set forth in this Limited Warranty. This Limited Warranty is the sole warranty offered by IMS with respect to the Product. IMS does not assume any other liability in connection with the sale of the Product. No representative of IMS is authorized to extend this Limited Warranty or to change it in any manner whatsoever. No warranty applies to any party other than the original Customer.

IMS and its directors, officers, employees, subsidiaries and affiliates shall not be liable for any damages arising from any loss of equipment, loss or distortion of data, loss of time, loss or destruction of software or other property, loss of production or profits, overhead costs, claims of third parties, labor or materials, penalties or liquidated damages or punitive damages, whatsoever, whether based upon breach of warranty, breach of contract, negligence, strict liability or any other legal theory, or other losses or expenses incurred by the Customer or any third party.

OBTAINING WARRANTY SERVICE

Warranty service may be obtained by a distributor, if the Product was purchased from IMS by a distributor, or by the Customer directly from IMS, if the Product was purchased directly from IMS. Prior to returning the Product for service, a Returned Material Authorization (RMA) number must be obtained. Complete the form at www.imshome.com after which an RMA Authorization Form with RMA number will then be faxed to you. Any questions, contact IMS Customer Service 860/295-6102.

Include a copy of the RMA Authorization Form, contact name and address, and any additional notes regarding the Product failure with shipment. Return Product in its original packaging, or packaged so it is protected against electrostatic discharge or physical damage in transit. The RMA number **MUST** appear on the box or packing slip. Send to: Intelligent Motion Systems, Inc., 370 N. Main St., Marlborough, CT 06447.

Customer shall prepay shipping charges for Products returned to IMS for warranty service and IMS shall pay for return of Products to Customer by ground transportation. However, Customer shall pay all shipping charges, duties and taxes for Products returned to IMS from outside the United States.

DISCLAIMER: The information in this book has been carefully checked and is believed to be accurate; however, no responsibility is assumed for inaccuracies.
